Venus apparels is based out of Kannur, Kerala. Kannur, a district situated in northern Kerala is known as the "Land of Looms" because of the loom industries which have been functioning & flourishing in the district since time immemorial. Several weaving centers & export houses flourish here. Earlier it was the pitlooms which was the traditional industry of Kannur & it was Germans who brought in frame looms which helped in further development of this industry. The handloom products from Kannur have a unprecedented demand in USA, UK, Japan and other European nations. The inimitatable quality and designs have given it a monopoly of its own in the international markets. Exports of this market include sarees to shirts, ready-mades to furnishing, table clothes to mats, napkins to pillow covers, cushion covers to bed spreads, curtains to draperies, potholders to aprons to anything in made up fabric.

Venus apparels is a sole proprietary company which commenced its operations in March of 2011. At Venus apparels we manufacture quality designer products for men, women and kids. As part of the same we also undertake export orders, job work orders etc., Daily production capacity at our facility is in the range of 800-900 formal shirts or 500-600 casual shirts.

Our office is situated right in the heart of this town and is just 0.5 km away from Kannur Railway station and 1 km from the local bus station. Kannur is well connected to the rest of India by both road and rail network. The nearest international airports is at Karipur, Kozhikode about 120 km away & Mangalore airport at 170 km away.

Presently we supply finished products to outlets in many cities in the south of India & to markets in Middle East Nations.
